

LIGATURE RESISTANT THERMOSTAT/UNIVERSAL WALL COVER #TM260

The patented TM260 Ligature Resistant Thermostat/Universal Wall Cover is designed to maintain secure conditions in behavioral hospital settings where ligature resistance is a concern.

The TM260 features sloped faces and sides to minimize ligature points and specially designed, ligature-resistant air circulation openings to allow free air flow. When installed with the included hardware and pick-free caulk, the TM260's base fits tightly against walls, preventing the risk of ligature.

The TM260 is constructed out of a 1/8" polycarbonate for abuse resistance and locked with a barrel lock and key for tamper resistance yet ease of access for facility personnel. The TM260 can also cover other wall fixtures requiring security, such as outlets, cable connections, and light switches, and can be mounted vertically or horizontally. The TM260 cover includes mounting hardware and can be retrofitted to existing rooms or installed in new facilities.

Behavioral Safety Products are thoughtfully designed and engineered per the behavioral industry's highest quality materials and performance standards.

Specifications

- Patented design
- Sloped faces to prevent ligature points
- Constructed of impact-resistant 1/8" polycarbonate for abuse resistance
- Locks with a barrel lock and circular key for tamper resistance and ease of maintenance
- Meets ADA standards when installed per manufacturer's instructions
- Comes with mounting hardware to attach it to the wall in either new or existing buildings
- Sized to fit most round or rectangular thermostats
- Can be mounted vertically or horizontally
- Shipping weight 3 lbs.
