

LIGATURE RESISTANT UNIVERSAL WALL FIXTURE COVER #TM265

Our patented ligature resistant Universal Wall Fixture Cover is designed to maintain secure conditions in behavioral hospital settings where ligature resistance is a concern. The TM265 provides a face and function which has not yet been offered to the behavioral industry.

We designed the TM265 Universal Wall Fixture Cover with clean modern aesthetics that features sloped faces and sides to minimize ligature points. The new TM265 is like our TM260 ligature resistant thermostat cover, but with a larger footprint to cover larger wall fixtures. The specially designed air circulation openings allow free air flow while offering resistance to possible ligature. When installed with the included hardware, the base fits snugly against the wall and when mounted with pick-free caulk the sloped base discourages ligature.

Constructed of 1/8" polycarbonate for abuse resistance, the TM265 has barrel locks and circular keys for tamper resistance and ease of access for healthcare or maintenance staff. The TM265 may be used to cover wall fixtures requiring security such as electrical outlets, cable connections, O2 connections or light switches and can be mounted either vertically or horizontally.

The TM265 cover includes mounting hardware and can be retrofitted to existing rooms or installed in new facilities.

Behavioral Safety Products' fixtures are thoughtfully designed and engineered using the highest quality materials and in accordance with the behavioral industry's performance standards.

Specifications:

- Patented design.
- Sloped faces to prevent ligature points.
- Constructed of 1/8" impact resistant polycarbonate for abuse resistance.
- Locks with a barrel locks and circular key for tamper resistance, and ease of maintenance.
- Comes with mounting hardware to attach it to the wall in either new or existing buildings.
- Sized to fit various wall fixtures.
- Can be mounted vertically or horizontally.
- Shipping weight 5 lbs.
